

Marcus Flynn

Senior Back-End Developer

marcus.flynn@email.com

Professional Summary

Senior Back-End Developer with over 10 years of experience designing backend architecture, implementing scalable microservices, and deploying high-performance APIs. Expert in Python, system design, and cloud-native technologies.

Skills

System Architecture, Microservices, Python, Node.js, Django, FastAPI, SQL/NoSQL Databases, Docker/Kubernetes, Cloud Services (AWS/GCP), API Gateway, Security Best Practices

Experience

Senior Back-End Developer - StackFlow Labs (2018 - Present)

- Designed backend systems handling millions of API calls daily.
- Migrated legacy monoliths to microservices with container orchestration.
- Mentored junior developers and led backend tech strategy.

Lead API Engineer - LogicNet (2013 - 2018)

- Built distributed APIs with FastAPI and PostgreSQL.
- Established API versioning and documentation standards.

Education

M.S. in Computer Science, University of Southern California, 2012
