Raj Mehra

Cloud Architect

raj.mehra@email.com

Professional Summary

Cloud Architect with 6 years of experience designing and implementing scalable cloud solutions across AWS and Azure. Strong in infrastructure automation, CI/CD integration, and cloud security best practices.

Skills

AWS (EC2, S3, Lambda, VPC), Azure (VMs, Functions, ARM), Terraform, CloudFormation, Kubernetes (AKS/EKS), Docker, CI/CD Pipelines, Cloud Cost Optimization, IAM Policies, Monitoring & Logging

Experience

Cloud Architect - NetFusion Systems (2020 - Present)

- Designed multi-region architectures for high availability and disaster recovery.

- Automated deployments with Terraform and integrated CI/CD with Azure DevOps.

- Implemented centralized logging and monitoring using ELK and Azure Monitor.

Cloud Engineer - CloudNova Solutions (2017 - 2020)

- Managed cloud resources and cost-efficient infrastructure scaling.

- Assisted in setting up hybrid cloud networks and VPN configurations.

Education

B.S. in Information Technology, Georgia Institute of Technology, 2016
